Each individual medication that you send with your child to Cate School requires it's own medication authorization form. Each medication authorization on file expires one year from it's signed date. After the medication authorization expires, The Cate Health Center requires a physician complete and send a new one to be able to continue to administer medication to your child. Please read the entirety of the Medication Policy at Cate School for any questions, concerns.

Physician Order for Medication Administration

The Cate School Medication Policy is firm regarding prescriptions and administration of psychotropics and/or controlled substances. All medications are administered by a Registered Nurse at the Health Center on campus. Mail-ordered medications sent directly to the Health Center will be accepted, however, a hard copy of the written prescription is still required. Additionally, the nurse is required to have a physician order for each medication on file in order to safely administer the medication to the student.

<u>Please have your physician complete a separate form for EACH medication your child is taking.</u>

Student's name:	
Student's Date of Birth:	
Medication Name:	
Medication Dose (please be specific):	All of these are required fields to fill out on your student's medication profile, therefore your form will be
Reason for Administration:	rejected if this is not filled out in its entirety
